

## Hitachi High-Tech Achieves CDP's Highest Score of "A List" in Water Security for the First Time

**Tokyo, February 7, 2024** – Hitachi High-Tech Corporation ("Hitachi High-Tech") today was selected for the 2023 "A List" by CDP<sup>\*1</sup>(headquartered in the UK), a non-governmental organization that conducts environmental research and information disclosure globally, out of more than 21,000 companies that were evaluated for their Water Security initiatives and transparency in information disclosure. In 2010, we registered with CDP and have continued our efforts to decarbonize, resource recycling and harmonized with nature, and today we have been selected for the first time as an "A List", the highest rating in the field of water security.

### ■ Hitachi High-Tech's Water Security Initiatives

As a member of the Hitachi Group, Hitachi High-Tech Group is pushing forward with efforts to fulfill an environmental vision and long-term environmental targets, "Hitachi Environmental Innovation 2050"<sup>\*2</sup>. We aim to realize a resource efficient society by improving water use efficiency by 50% or more compared to the base year by FY2050 through the use of circular water and investment in water-saving facilities. Hitachi High-Tech Group is working to utilize water effectively by reducing the volume of water used through initiatives including productivity improvements and upgrading to water-conserving equipment. As a result, we pursued our activities in FY2022 with a target for water use efficiency 49% compared to the base year FY2010 and achieved 62.1%.

At manufacturing process, we have introduced environmentally conscious design (eco-design), visualized, and improved the environmental impact, including volume of water consumption, throughout the product life cycle, and aim to provide products with reduced environmental impact.

In addition, Hitachi High-Tech Group aims to realize a resource efficient society through initiatives throughout the value chain, and ask our suppliers to cooperate with us in reducing volume of water consumption and preserving water quality based on the Hitachi Group Sustainable Procurement Guidelines. We will continue to work with our suppliers to conduct corporate activities that are responsible for the global environment.

Encouraged by this selection as an "A List" in the field of water security, Hitachi High-Tech Group will continue to create environmental value through manufacturing aimed at reducing environmental impact and strengthening environmental management, with the aim of contributing to a sustainable global environment.

<sup>\*1</sup> CDP: CDP is a global non-profit charity that runs the global disclosure system for investors, companies, cities, states and regions to manage their environmental impacts. The organization analyzes and evaluates the environmental initiatives and information disclosure of the world's major companies in the three themes of climate change; water security; and forests - and selects the best companies as "A List" companies each year.

<sup>\*2</sup> Hitachi Environmental Innovation 2050: Long-term goals established to aim toward building a "decarbonized society," a "resource efficient society" and a "harmonized society with nature" by 2050, set out under the vision that "Hitachi will resolve environmental issues and achieve both a higher quality of life and a sustainable society through its Social Innovation Business in collaborative creation with its stakeholders," which Hitachi instituted as its Environmental Vision.
